

An easy-to-use, powerful, web-based content repository with built-in capture.

The powerful and lean web-based architecture of ILINX Content Store provides secure repository, scalable and affordable capture, search and storage for all of your document types and digital assets.

Users access ILINX Content Store on a desktop or tablet delivered through a browser, while administrators maintain and control user security and access in seconds from a central location. This robust application deploys in a fraction of the time it takes to set up a traditional ECM system.

Benefits & features

A single, affordable platform for streamlined, end-to-end document management

- › Clean and agile—not laden with features you'll pay for but never use
- › Web-based—enables capture, search and retrieval of documents from any Windows desktop
- › Removes the “mess” of data dispersed in network folders & simplifies search
- › Easy to master interface promotes acceptance and adoptability and requires minimal training
- › Low cost system maintenance

Simple, centralized administration

- › Deploy from any location—have it up and running in minutes
- › Allows back-up and security using standard processes
- › Test-to-production capable—import/export system configurations

Flexible & enterprise security

- › Administrators have a variety of ways to manage access and control security
- › Supports Built-in or Active Directory security

Powerful document management capabilities

- › Retention Management to automate the management of documents through entire lifecycle
- › Document Versioning—replace, restore & discard files with complete version history
- › “Notebook”—make a temporary subset application—work offline and sync later

Advanced access, searching & viewing

- › A variety of search options, including keyword or advanced boolean
- › Advance search allows streamline user experience by limiting access to content based on metadata
- › Favorite Searches feature generates links based on each user's search history
- › Access and view docs on multiple popular browsers on both Mac and PC
- › Supports annotations, secure redactions, rotation, zooming, etc
- › External searching capabilities to enhance security and augment data in results set
- › Generates searchable PDFs

Configurable & intuitive options for getting documents in

- › Drag and drop documents from desktop
- › Built-in and configurable data input sources
- › Integrate to receive content from external systems
- › Supports a large variety of content types
- › Can serve as a temporary repository and release to an ECM system

View, Edit & Share documents with ease from within interface

- › View media, like videos, right in the ILINX viewer
- › Edit and check in Microsoft Office Word without leaving ILINX
- › Send as links, native documents, print, XPS or PDF
